AccuCoat Adds Ultra-High Performing Spectrophotometer!

AccuCoat, a custom supplier of optical coatings on plastic, metal and glass components, has upgraded its metrology equipment with the addition of Perkin Elmer's LAMBDA 950 spectrophotometer.

The LAMBDA 950 is one of Perkin Elmer's highest performance UV/Vis/NIR Systems. AccuCoat chose this model for ultra-high UV/Vis/NIR performance for wavelengths from 185 - 3300 nm, high precision measurements, and for applications such as highly reflective and anti-reflective coatings, color correction coatings, Vis and NIR filters, and more. We are pleased to add this new piece of equipment to our test equipment arsenal.
