Rochester is covered in small and mid-sized optics companies that focus on photonics. Each week, the *Democrat and Chronicle* will highlight one of the companies.

Company: [AccuCoat](#)

Year founded: 1998

Employees: 18

Headquarters: 111 Humboldt St., Rochester

Specialty: AccuCoat makes a special coating that goes on glass, metal or other materials. The coating, once hit with light, strengthens a beam of light, reflects the light or control where the light goes. The company also makes coatings that are anti-reflective of light. AccuCoat was created by two former Bausch + Lomb employees who worked in the optical coating and eyewear divisions.
